SUMMARY

Derelict Heart is a kinetic document of our Lone Tramp character caught in the instant of the unknown, where everything seems strange and everything seems familiar. Strange in that our tramp must scale the shadowy innards of an abandoned Hell's Kitchen tenement to reach the curious masses of water towers that crowd Manhattan's rooftops. Familiar in that we all have made that desperate journey onward and upward toward the curious. In this instant for our lone tramp character it seems this is to be his last day and therefore meaning is unavoidable. Does a better world await?
